

## Job Description – Senior Frontend Developer

**Job Role:** Senior Frontend Developer position

**Status:** Full-time position

**Location:**

**To apply:** Send your CV and other relevant material (portfolio, website, cover letter...)

**We are looking for an experienced Senior Frontend Developer to join our dynamic team.**

### Who are we ?

We're Redslim, we help global CPG companies efficiently maximise the value of their datasets. We transform fragmented data into powerful business intelligence assets in partnership with top players in the tech and data industry.

Global leading brands such as L'oreal, Unilever, Mars, Danone and so many more rely on our robust data services to enable their transformation towards data-driven companies.

To achieve this goal, we bring together professionals from different countries, at all levels and from diverse backgrounds. We have offices in Zurich, Oxford, Madrid and Paris, and a team of 97 spread across Europe serving organizations across the globe.

When you join Redslim you enter a growth journey. You will be empowered to thrive, grow professionally and make a difference every day. Your voice will be heard as we operate in an employee-centric fashion.

### Our Values:

- **Passion, Commitment, Curiosity, Agility** | Our core values guide everything we do, from our approach to work through to how we treat people. People are trusted and flexible to adapt, a community which we are proud to be part of.
- **Different locations, one company** | We recruit based on talent rather than location, technology is there to keep us connected.
- **A collaborative environment** | We build outstanding relationships as a strong team in which confidence can grow and ideas can flow.
- **An open mindset** | We feel only restricted by the bounds of our imagination.

**About the role:**

We have an exciting opportunity for a skilled frontend developer with a robust background in modern development practices. You will work extensively with React and Next.js, MUI, ReactQuery, and Typescript. Our backends are powered by .NET 8 and everything is hosted on Azure, offering you a comprehensive environment to hone your skills and contribute to our dynamic projects.

**Key Responsibilities:**

- Develop and maintain high-quality web applications using React and Next.js.
- Write clean, maintainable, and efficient code in TypeScript.
- Implement and style user interfaces using Material UI.
- Ensure the technical feasibility of UI/UX designs and implement them.
- Mentor developers.

**Requirements:**

- Proven experience as a Frontend Developer with a focus on React and Next.js.
- Strong proficiency in TypeScript.
- Experience with React Query for data fetching and state management.
- Proficient in Material UI and modern CSS.
- Solid understanding of web development principles and best practices.
- Familiarity with CI/CD pipelines and modern development workflows.
- Good communication skills in English.
- Experience with dotnet would be a plus.
