Job Description – Senior Data Engineer

Job Role: Senior Data Engineer (Hybrid / Remote)

Status: Full-time position

Location: Portugal, France, Spain, Italy, United Kingdom, the Netherlands.

To apply: Send your CV and other relevant materials (portfolio, website, cover letter…) to careers@redslim.net

We are seeking a Senior Data Engineer to join our dynamic and growing team. This role offers a unique opportunity to work in a hybrid model, combining remote and on-site work, with exposure to global clients and cutting-edge data technologies. If you're passionate about data, thrive in solving complex challenges, and have experience managing workloads, we want to hear from you!

About the Role

As a Senior Data Engineer, you will play a critical role in designing, building, and maintaining data pipelines and solutions to support our clients' diverse needs. You will work closely with internal and external stakeholders to ensure high-performance, scalable, and reliable data integration across projects. Additionally, you will be involved in capacity planning, managing workloads for specific projects, and act as an escalation point for assigned projects to ensure the delivery of top-quality solutions.

Key Responsibilities

- **Data Engineering Expertise:**
    - Design, implement, and maintain data integration pipelines using **Python** and **Spark** (e.g., **PySpark**).
    - Build data solutions to process data at scale, handling mainly batch processes (experience with real-time pipelines as a plus).
    - Research and implement modern industry best practices, ensuring adherence to high standards.
    - Optimize data systems and processes to improve performance and scalability.

- **Collaboration & Client Engagement:**
    - Work closely with clients to understand project requirements and deliver tailored solutions.
    - Act as a point of contact for escalations, conducting root cause analysis and ensuring timely resolution.
    - Support **capacity planning** and **workload management** for specific projects.

- **Technical Support & Documentation:**
    - Provide technical support and guidance for internal teams and clients regarding the data platform.
    - Develop and maintain comprehensive documentation for data pipelines and workflows.

What we're Looking For

- **Experience:**
    - 4+ years of experience in data engineering or a similar role.
    - Strong hands-on experience with Python, Spark, and cloud platforms (MS Azure and Databricks preferred).
    - Proven experience in managing client-facing projects and handling escalations.
    - Experience in consumer data / working with external data agencies is a plus.

- **Skills:**
    - Strong problem-solving mindset and ability to handle complex technical challenges.
    - Experience in workload management, capacity planning, and project delivery within deadlines.
    - Deep understanding of ETL processes.
    - Interest in AI / ML is a plus.

- **Seniority to interact with different levels of stakeholders:**
    - Clients: Gather requirements and offer recommendations on addressing a specific need.
    - Internal stakeholders including Operations, business development: Offer capacity estimates and delivery support.
    - Data Engineers: Act as the go-to-person for technical and process reference, providing support when obstacles may arise.

Why Join Us?

- Fresh, Agile, Entrepreneur environment with direct and full exposure to corporate initiatives.
- Full on-boarding training and on-boarding plan.
- Flexible work environment within a cohesive and collaborative team.
- Competitive package commensurate with experience.
- Exposure to global clients and cross-functional teams.

If you're ready to take the next step in your data engineering career, apply today and join our team of experts!

About Redslim 2024

Redslim streamlines data management for teams faced with the request to leverage fragmented datasets for critical decision making. Specialized in data engineering, harmonization and BI, their teams

manage data from over 50 agencies and covering more than 55 countries. Their technology-enabled services optimize data consumption for more than 30 global organizations. Active for more than 10 years, Redslim is constantly innovating their solutions to always meet the evolving needs of their clients and data partners.
