

## Azure DevOps Engineer

**Job Role:** Azure DevOps Engineer

**Status:** Permanent

**Reporting to:** Chief Technology Officer

Please note that all applications must be submitted via the **LinkedIn Applicant Tracking System (ATS)**. Unfortunately, we are not able to respond to applications sent directly to our individual mailbox.

### About the Role

Are you passionate about building robust, automated, and scalable cloud solutions? Redslim is looking for an **Azure DevOps Engineer** to design, implement, and manage deployment automations that power data platforms and web applications across our business.

You will work with cutting-edge Azure technologies—Data Factory, Databricks, containerized tools, web apps, and databases—to ensure efficient operations and optimal platform performance. This role blends automation engineering, cloud optimization, and cross-team collaboration to enhance productivity and reliability in a rapidly evolving environment.

At Redslim, you'll be part of a forward-thinking technology team that values creativity, transparency, and teamwork. You'll have opportunities to experiment with emerging technologies, contribute to meaningful projects, and be part of an organization committed to your growth and wellbeing.

### Key Responsibilities

- Develop and manage deployment automations using Azure tools and Infrastructure as Code (IaC).
- Implement and maintain Azure DevOps pipelines to support continuous integration and delivery.
- Monitor platform availability, performance, and user experience to ensure seamless operations.
- Collaborate with enterprise IT teams for configuration, maintenance, and improvement of the cloud platform.
- Optimize resource use to enhance operational efficiency and cost-effectiveness.
- Drive continuous improvement and share best practices across teams and business units.
- Contribute to team capacity planning and growth initiatives within the technology division.

### What we're Looking For

#### Experience:

- Advanced knowledge of Azure (3+ years) and Infrastructure as Code (IaC) deployment practices.
- Proven experience in managing and optimizing Azure DevOps pipelines.
- Practical scripting experience with PowerShell, Bash, or Python.
- Familiarity with data processing and data engineering concepts.
- Experience collaborating across enterprise IT and cloud infrastructure teams.

**Skills:**

- Strong communication skills in English.
- Excellent problem-solving and analytical thinking abilities.
- Ability to work autonomously and manage priorities effectively.
- A proactive approach to continuous learning and personal development.
- Leadership and mentoring skills are a plus—helping teams grow through technical guidance and collaboration.

We can accept only CVs submitted in English.

**We're currently considering candidates who are authorized to work in Spain.**

**About Redslim**

Redslim streamlines data management for teams faced with the request to leverage fragmented datasets for critical decision making. Specialized in data engineering, harmonization and BI, their teams manage data from over 50 agencies and covering more than 55 countries. Their technology-enabled services optimize data consumption for more than 30 global organizations. Active for more than 10 years, Redslim is constantly innovating their solutions to always meet the evolving needs of their clients and data partners.
